For DMM

Let's travel with DOA Venus

This is a poolside stage mod.

Concept: Capture the image of Google Street View and display it in VR.

Installation: Place it anywhere under the mod holder.

If you do not need it, disable it or delete it.

You can use dds and jpg images in the background.

The background can be the type of requirectangular..

If you enable "VR jpg .ini", you can use jpg images downloaded directly from the site..
