

请注意

部分恶魔的名字和图片上的名字不匹配。

这是因为作者在 1.74 以后的版本修改了名字。

请以红字为准。

怎样使用文中的代码

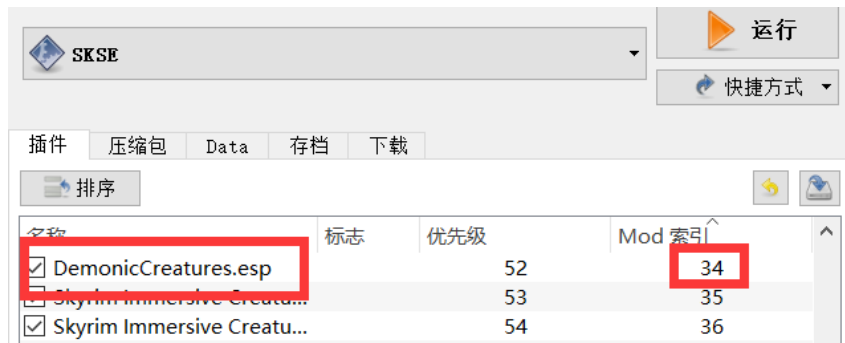

游戏中按 “~”打开控制台，手动输入下列代码

`player.placeatme 怪物 id 数量`

然后点击回车，就会在你前面出现怪物。

如果不输入数量，那就默认出现一个怪物。

XX 代表的是游戏 esp 的排序，见下图（Mod Organizer 截图）

比如我想召唤一个奥戈罗德，根据截图，我就可以直接输入

`Player.placeatme 34025A1E 1`

这样就会出现在我面前了。

注意！ `Player.placeatme` 和 `34025A1E` 和 `1` 之间有空格！

Attention

Some demon names do not match the names on the pictures.

Because the author changed the names after the version 1.74.

Please refer to the red text for details.

How to use the code after the monster's name

Press "~" in the game and type the console below

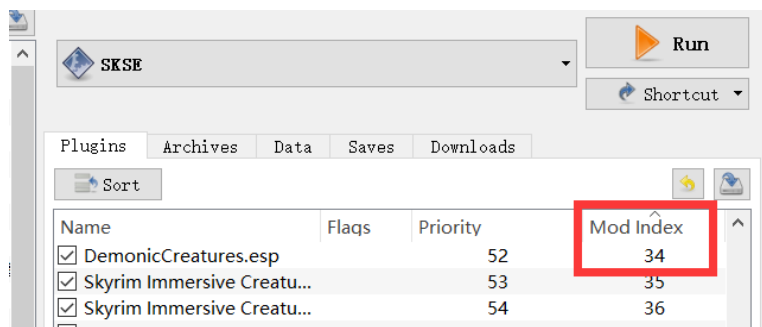

`player.placeatme monster-id number`

then press Enter and the monster will be in front of you.

If you don't type the number, then there will be only one appearing.

XX stands for the order of this esp. See the pic below (via.

Mod Organizer)

e.g. I want to summon an Ogrid, so I can enter the code

`Player.placeatme 34025A1E 1`

And it will appear near me.

Attention! there is a space among `Player.placeatme,`

`34025A1E` and `1`.

They're really small and flying rapidly. In fact, if I didn't use follower mod magic to force them staying with me, I can't take these pics. Also, they can run with sexlab framework and the animation belongs to Charus Hunter. But they're too small...so these birds are invisible during the sexlab time and the player seems like doing solo work in the air. 他们飞得太快，体积太小。我用了强制跟随的随从魔法才拿到这些截图……根本追不上。这些小鸟可以使用实验室框架，动画调取的是查鲁斯猎手。但是小鸟体积太小啦……所以啪啪啪的时候你看不见小鸟出现，只能看到抓根宝在那自己对着空气摆 pose.
